section-01

KNOW YOUR VALUE

These first five prompts help you uncover that value and turn it into language you can use throughout your job search.

prompt-01

DISCOVER YOUR TRANSFERABLE SKILLS

You know what you've done in your career, but you're unsure which of those skills can be valuable in other roles.

copy this prompt :-

Act as a career strategist specializing in non-technical professionals.

Here is my work experience:

[PASTE YOUR WORK EXPERIENCE]

Analyze my experience and identify my strongest transferable skills.

For each skill:

Name the skill.

Give specific evidence from my experience that demonstrates it.

Explain why this skill is valuable to employers.

Identify other roles where this skill could be useful.

Tell me how I could demonstrate this skill on my resume or during an interview.

Also identify up to 5 strengths I may be overlooking.

Do not invent qualifications, achievements, responsibilities, or experience. Base your analysis only on the information I provide.

prompt-02

FIND YOUR PROFESSIONAL STRENGTHS

*You can describe your job, but struggle to answer:
"What am I actually good at?"*

Do not make assumptions that aren't supported by my experience. If there isn't enough evidence to determine something confidently, say so.

prompt-03

TURN RESPONSIBILITIES INTO ACHIEVEMENTS

*Your resume currently sounds like:
"Responsible for managing customers."
instead of showing what you actually accomplished.*

copy this prompt :-

Act as a professional resume writer.

I am applying for **[TARGET JOB TITLE]**.

Here are the responsibilities from one of my previous roles:

[PASTE YOUR RESPONSIBILITIES]

For each responsibility:

1. Identify the action I took.
2. Identify the purpose, problem, or objective behind the work.
3. Identify any measurable result or impact that I provided.
4. Rewrite it as a concise resume bullet.

Where useful information is missing, tell me what real information or metrics I could look for to strengthen the bullet.

Do not invent numbers, achievements, results, clients, responsibilities, or qualifications.

Keep the language natural and professional. Avoid unnecessary buzzwords.

prompt-04

FIND YOUR PROFESSIONAL DIFFERENTIATOR

You feel like your resume looks similar to everyone else's.

Your differentiator isn't necessarily something dramatic. It could be a combination of experience, industry knowledge, skills, or the types of problems you've repeatedly solved.
